## - 26 -Claims

An anti-annexin antibody or fragment thereof, wherein the antibody or fragment is capable of specifically binding to an annexin present on a cell that is undergoing apoptosis.

- 2. The antibody fragment according to claim 1 wherein it is a Fab or F(ab')<sub>2</sub> fragment.
- The antibody or fragment according to any one of the preceding claims, wherein it is a monoclonal antibody or fragment thereof.

15

25

- 4. The antibody or fragment according to any one of the preceding claims, wherein it is labeled.
- 5. The antibody or fragment according to claim 4, wherein the label is an effector molecule, a toxic substance or a radioactive substance.
- 6. A pharmaceutical composition, comprising as the active ingredient an antibody or fragment thereof capable of specifically binding to an annexin present on a cell that is undergoing apoptosis.
  - 7. Use of an anti-annexin antibody or fragment thereof for the detection and/or monitoring of apoptosis, in vitro, ex vivo or in vivo.
  - 8. Use of an anti-annexin antibody or fragment thereof for modulating an immune response.
- 9. Use of an anti-annexin antibody or fragment thereof for inducing and/or increasing an inflammatory response.

- 27 -

- 10. Use of an anti-annexin antibody or fragment thereof for targeting tumor cells and/or tumor tissue.
- 11. Use of an anti-annexin antibody or fragment thereof for inducing an inflammatory response to tumor cells.
  - 12. Use of an anti-annexin antibody or fragment thereof for blocking the development of tolerance against tumor cells.
- 13. Use of an anti-annexin antibody or fragment thereof for the production of an agent for the diagnosis and/or treatment of diseases linked to apoptosis.
- 14. Use of claim 13, wherein the diseases linked to apoptosis are selected from the group consisting of cancer, diabetes, autoimmune diseases and cardiovascular and vascular diseases.

20

30

- 15. Use of claim 14, wherein the autoimmune disease is diabetes, rheumatoid arthritis, lupus erythematosus or multiple sclerosis.
- 16. Use of any one of claims 7 to 15, wherein the anti-annexin antibody is labelled.
- 17. Use of claim 16, wherein a labelled anti-annexin antibody is used for the production of a diagnostic agent for the detection of tumor cells after or during conventional cancer therapy.
  - 18. Use according to anyone of claims 1-17, wherein the anti-annexin antibody is specific for annexin I, annexin II, annexin IV, or annexin V.
  - 19. A method for detecting and/or monitoring apoptosis comprising:

- 28 -

- (i) providing a sample to be analysed, comprising cells;
- (ii) detecting an annexin present on the surface of said cells by adding a substance capable of specifially binding to an annexin present on a cell that is undergoing apoptosis.

5

- 20. The method of claim 19, wherein the substance of step (ii) is an antibody or fragment thereof capable of specifically binding to an annexin present on a cell that is undergoing apoptosis.
- 10 21. Use of an annexin and/or functional fragments thereof and/or fusion protein comprising an annexin or functional fragments thereof, for the production of an agent for inhibiting an inflammatory response.
- 22. Use of an annexin and/or functional fragments thereof and/or fusion protein comprising an annexin or functional fragments thereof, for the production of an agent for the diagnosis and/or the treatment of a disease linked with apoptosis and/or cell death and/or inflammation.
- 23. Use according to claim 22, wherein the disease is selected from the group consisting of a ischaemic reperfusion damage, stroke, chronic heart failure, myocardial infarction, spinal cord injury, acute liver failure, renal ischaemia, neurodegenerative diseases such as Alzheimer, Parkinson's diease, sepsis, HIV-infection and autoimmune diseases, in particular multiple sclerosis.

25

30

24. Use of an annexin and/or functional fragments thereof and/or fusion protein comprising an annexin or functional fragments thereof, for the production of an agent to inhibit an inflammatory response to tissue, in particular transplantation tissue.

- 29 -

25. Use according to anyone of claims 21-24, wherein the annexin used is annexin I, annexin IV or annexin V.
